#### NOTE TO PARENTS

Your child has been learning about fire safety at school and may have questions to ask you.

We have been learning about the importance of having working smoke alarms in the home and making sure the alarms are checked every week by pushing the button and listening for the alarm. Unless your alarm is mains operated, we recommend you change your battery every year and regularly vacuum out any dust.

Your child has also been learning that if they find matches and lighters, they should tell an adult. To avoid any problems, please make sure you always keep matches and lighters out of children's reach.

We have also been learning about the importance of having a home fire action plan so that children know how to get out in a fire.
