

Plan your educational outreach sessions or remote delivery using StayWise

Saving lives through education

Hereford & Worcester Fire and Rescue Service is supporting StayWise – (www.StayWise.co.uk), a free learning platform aimed at pupils aged 3 -11 years old with later key stages available soon.

StayWise brings together the educational resources of the emergency services linked to the national curriculum. That means pupils can learn about fire safety as part of a maths or science lesson, or write an escape plan instruction and how to keep safe in an English lesson.

The site offers free lesson plans, videos, and activity sheets to help educators teach young people about potentially lifesaving advice within core curriculum subjects.

With many parents and carers home-schooling due to the pandemic, there are plenty of useful resources available.

Caroline Webster, Community Risk at **Hereford & Worcester Fire and Rescue** said: “As a fire and rescue service, we are committed to keeping our communities safe. StayWise is a fantastic new resource for everyone to use. Offering teachers, parents and the emergency services consistent and effective educational materials to help young people learn about a range of safety topics. It’s even more critical when so many of us are isolated and need to make positive decisions in our day-to-day lives to keep ourselves and our loved ones safe.”

The National Fire Chiefs Council (NFCC) leads on the partnership behind StayWise. Partners include the Royal Life Saving Society, the RNLI, HM Coastguard, the Association of Ambulance Chief Executives, the National Police Chiefs Council and the Injury Minimisation Programme for Schools.

The StayWise website is easy to use – just select an age group, subject, or theme, and you will find a collection of resources to keep students busy. Create your account and profile to start exploring your resources.
