██████████,

I've recontacted ██████████, they are looking at upto 15 persons. They have a fire detection system, fire exits from the area lead straight outside to a place of safety, they will be staffed 24hrs and sleepers monitored drugs/alcohol etc.

Cheers

Morning ██████████

I spoke to the lady yesterday to give her advice.

The number will depend on their risk assessment but will be based on floor space factor of 1 person per 5m².

They are only using one room, which has fire detection, 2 fire exits and is staffed 24hrs whilst the sleepers are there.

I will be calling her back today to ascertain their figures.
