

1. Which Fire and Rescue Service in England are you completing this survey on behalf of?

Please select only one service per questionnaire. If responding to the Minister's request for procurement information on behalf of more than one service, you need to complete one survey each to enable the publication of single-service information tables on Police.uk.

1. What is the name of the Fire & Rescue Service on behalf of which you are completing this survey? *

- Avon
- Bedfordshire and Luton
- Buckinghamshire
- Cambridgeshire and Peterborough
- Cheshire
- Cleveland
- Cornwall
- County Durham and Darlington
- Cumbria
- Derbyshire
- Devon & Somerset
- Dorset and Wiltshire
- East Sussex
- Essex
- Gloucestershire
- Greater Manchester
- Hampshire
- Herefordshire and Worcestershire
- Hertfordshire
- Humberside
- Isle of White
- Isles of Scilly
- Kent & Medway Towns
- Lancashire
- Leicester, Leicestershire and Rutland

- Lincolnshire
- London Fire Brigade
- Merseyside
- Norfolk
- Northamptonshire
- Northumberland
- North Yorkshire
- Nottinghamshire and City of Nottingham
- Oxfordshire
- Royal Berkshire
- Shropshire
- South Yorkshire
- Stoke-on-Trent and Staffordshire
- Suffolk
- Surrey
- Tyne and Wear
- Warwickshire
- West Midlands
- West Sussex
- West Yorkshire

2. Please give the following information about the service's most recent purchase of Fire Fighting Helmet (without torch), using the descriptors provided below as reference standards to inform your answer:

Standard descriptors: BS EN 443:2008 Helmets for fire fighting in buildings and other structures
BS EN 14458:2004 Personal eye-equipment. Faceshields and visors for use with firefighters and high performance industrial safety helmets used by firefighters, ambulance and emergency services. Please use the comments box to detail different specifications. If leased/managed service, please provide information on replacement of the item.

2. Referring to the most recent purchase of this item, please provide: *

Unit price? (£)	<input type="text" value="167.05"/>
	*
Quantity bought in this single purchase?	<input type="text" value="12"/>
	*
Date of purchase? (dd/mm/yyyy)	<input type="text" value="11/06/2016"/>
	*
Supplier's name? (not for publication)	<input type="text" value="Bristol Uniforms"/>
	*

Additional information:

HWFRS are part of the national ICP project and as such the cost above is the replacement cost of the item only. It should be noted this is a fixed price for the term of the contract (7.5 years). HWFRS has had a contract with Bristol Uniforms (for the last six years) which provides a fully managed service. HWFRS has a 15 year (2 x 7.5yr parts) lease arrangement with Bristol Uniforms that costs £500.84 per Firefighter per annum for a full issue of all firefighting Personal Protective Equipment (PPE). If all procured individually would cost £980, (1x tunic, 1x over trousers, 1x helmet, 2x hood, 2x pairs of gloves, 1x leather boots, 1x rubber boots)

This annual cost (£500 per person) includes full maintenance, supply, collection, delivery, stock management, cleaning and repair as well as the availability and resilience of additional stock. The contract is for 15 years and divided into two parts with the current full set of PPE in use for 7.5 years which represents an overall cost of £3,756. After deducting the equivalent replacement costs of all the items supplied it can be seen that for a 7.5 year-term the fully managed system and services received cost £2776 or £370 per annum per person. At the 7.5 year point the PPE receives a technical refresh and completely new set of PPE is issued for the second term of the contract under similar arrangements.

3. Was the purchase: *

	Yes	No
Made under a collaborative framework or contract?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
A collaborative (joint) purchase?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

4. If you have answered 'Yes' at least once to the previous question, please detail:

What is the name of the lead contracting authority? (not for publication)

Formerly Firebuy now Crown Commercial Service (CCS)

What is the name of the framework or contract reference? (not for publication)

Central PPE and Clothing Contract (CPCC)

3. Please give the following information about the service's most recent purchase of Fire Hood, using the descriptors provided below as reference standards to inform your answer:

Standard descriptors: BS EN 13911: 2004 + annex A & B, Protective clothing for firefighters. Requirements and test methods for fire hoods for firefighters: BS EN 367:1992 Protective clothing. Protection against heat and fire. Method for determining heat transmission on exposure to flame. BS EN ISO 13688:2013 Protective clothing. General requirements. Please use the comments box to detail different specifications. If leased/managed service, please provide information on replacement of the item.

5. Referring to the most recent purchase of this item, please provide: *

Unit price? (£)

*

Quantity bought in this single purchase?

7. Please give the following information about the service's most recent purchase of Fleece (or Jumper, if Fleece not purchased by the service), using the descriptors provided below as reference standards to inform your answer:

Standard descriptors: BS 5426:1993 Specification for workwear and career wear BS 1771-2:1990 Fabrics for uniforms and workwear. Specification for fabrics from cellulosic fibres, synthetic fibres and blends. Please indicate whether the information given relates to the purchase of Fleece and costs include the service's logo/badge in the comments box.

17. Referring to the most recent purchase of this item, please provide: *

Unit price? (£)

*

Quantity bought in this single purchase?

*

Date of purchase? (dd/mm/yyyy)

*

Supplier's name? (not for publication)

*

Additional information:

As part of the national PPE contract (referred to above) the workwear was an additional part of the nationally led contract through Firebuy (now managed by Crown Commercial Service, CCS) termed the Integrated Clothing Project (ICP). This offered to provide a full set of workwear including the item listed above.

The costs for this were determined and available through the nationally led contract. The workwear is purchased and owned (not leased), but is still part of managed system for stock requests and allocation (not laundering etc), whereby stock is not held in HWFRS but managed remotely through a Bristol Uniforms supplied IT solution. The clothing can be sent direct to the user thereby removing the need for HWFRS handling of these items.

18. Was the purchase: *

	Yes	No

*

Additional information:

As part of the national PPE contract (referred to above) the workwear was an additional part of the nationally led contract through Firebuy (now managed by Crown Commercial Service, CCS) termed the Integrated Clothing Project (ICP). This offered to provide a full set of workwear including the item listed above.

The costs for this were determined and available through the nationally led contract. The workwear is purchased and owned (not leased), but is still part of managed system for stock requests and allocation (not laundering etc), whereby stock is not held in HWFRS but managed remotely through a Bristol Uniforms supplied IT solution. The clothing can be sent direct to the user thereby removing the need for HWFRS handling of these items.

Within the white shirt (short sleeve) open neck Bristol uniforms workwear there is no additional cost for the logo/badge and to remove it would not make any difference to the cost of the garment from this supplier.

HWFRS also procures white shirts from WM Sugdens for officers day wear (closed neck to wear with a tie) which are not the same as the workwear shirts listed above. WM Sugdens short sleeve white shirts cost £7.50, plus optional embroidery of logo on chest of £4.74. This item is pending procurement review.

*

Additional information:

This purchase was made through nationally led procurement project (FireBuy) and a framework supplied and managed by FireBuy. This BA set has full telemetry and has a communications option which was also procured for every fire engine. These BA sets were procured with several other neighbouring FRSs giving additional resilience and compatibility. The BA sets were managed, delivered and Firefighters were trained as part of a collaborative process with these other FRSs (Warks, West Midlands & Staffs FRS).

Fully managed service descriptor -10 year fully managed service (agreed at outset of contract) that covers the repair and maintenance of BA sets. Includes callouts (attendance within 60 hours) and fair wear and tear replacement programme. Contract expiry November 2019.

Quantities below are approximate as many items were purchased as component parts (i.e. a BA set is made up of 5 or 6 itemised pieces)

244 x PSS 7000 BA Sets

797 x Cylinders

56 x Merlin BA Boards

4 Merlin simulators

20 x Repeaters

34 pool stock

118 personal issue masks

52 Ease

2 leaky feeders

14. Please give the following information about the service's most recent purchase of Breathing Apparatus Cylinder, using the descriptors provided below as reference standards to inform your answer:

Standard descriptors: 9 litre BA Cylinder. United Kingdom Health and Safety Executive specification HSE-AL-FW2. BS EN 144:1991, Respiratory protective devices - gas cylinder valves. (BS EN 144:1 2000, BS EN 144:2 1999) BS EN 1089-3:2011, Transportable gas cylinders. Gas cylinder identification (excluding LPG). Colour coding. BS EN 12245: 2009, Transportable gas cylinders. Fully wrapped composite cylinders. (BS EN 1089-3:2011) BS EN 12021:1999, Respiratory Protective Devices. Compressed Air for Breathing Apparatus. Please indicate variations in the comments box e.g. if cylinder capacity is not 9 litre.

38. Referring to the most recent purchase of this item, please provide: *

Unit price? (£)

£185

*

Quantity bought in this single purchase?

797

*

Date of purchase? (dd/mm/yyyy)

November 2009

*

Supplier's name? (not for publication)

Draeger Safety Ltd

*

Additional information:

This purchase was made through nationally led procurement project (FireBuy) and a framework supplied and managed by FireBuy. This BA set has full telemetry and has a communications option which is on every fire engine (price for BA set with additional communications facility, but excluding torch and personal line is £1500). These BA sets were procured with several other neighbouring FRSs giving additional resilience and compatibility. The BA sets were managed, delivered and Firefighters were trained as part of a collaborative process with these other FRSs (Warks, West Midlands & Staffs FRS).

Fully managed service descriptor -10 year fully managed service (agreed at outset of contract) that covers the repair and maintenance of BA sets. Includes callouts (attendance within 60 hours) and fair wear and tear replacement programme. Contract expiry November 2019

	*

Additional information:

Since 2009 HWFRS has utilised a Land Rover product for officer vehicles, and for some selected operational vehicles. The Land Rover officer vehicles have a high residual value, hence offsetting their initial purchase cost. The financing model used gives an annual cost to the tax-payer which is comparative to that of a normal average road car previously purchased (pre 2010).

Following severe and prolonged flooding events in 2007 and following the Pitt review, HWFRS reviewed a number of areas of response, which included the provision of officer vehicles against risks and terrain they may be expected to be used in. The procurement of officer's cars has been recently reviewed and details are published on the Service website.

Being a predominately rural FRS with not only a regular flooding risk but terrain that can be hard

to access in normal weather, the Service provides a 4WD capability to every officer to ensure operational effectiveness and mobility in winter weather (flooding, snow and frost). Since 2007 this has proved invaluable in even relatively light winter conditions where snow and ice pose significant challenges and risk to responding officers. With the predominance of minor class roads that have low levels of winter maintenance, alongside remote rural properties on unmade roadways the Land Rover product has proven to be a robust and resilient support in delivering operational effectiveness. The Land rover products used offer resilience in adverse weather throughout the year which avoids vehicles losing traction and leaving the roadway, as well as a high degree of safety for travelling on rural roadways, where a car or similar vehicle would not. The Service also receives preferential rates to use Land Rover facilities in the Service area and deliver wide ranging off road and severe weather training programme at very low cost as a result of using Land Rover products.

Additional information:

Scania Rescue pump built by E1, with an expected operational life of 15 years. HWFRS have mainly used Scania chassis since 2005 and in the last 11 years have received high levels customer support, low levels of breakdowns and repairs and it may be expected that the vehicles could exceed their 15 year lifespan. This matter is pending a procurement review (2017), where this will be reassessed and compared to other market providers.

The vehicle is a Scania 18t, 280 horse power, 4X2 Safety crew cab, CP28 with a wheel base of 4300mm able to transport 6 FF to an incident. To further increase the vehicle capability in poor winter weather conditions, the vehicle is fitted with a snow chain system operated electronically from the driver's cab. The vehicle comes with a 2010 Godiva fire pump controlled by an electronic pump controller from the pump bay. The pump serves both high and low pressure hoses. Foam if required can be inducted in the hoses. The electronic pump controller has been developed and is both simple and intuitive, and provides faster firefighting capability whilst minimising the potential for errors by embedding pre-arranged operating pressures in the system. The vehicle also has an incident data logger to assist with accident investigation; via its CAN bus wiring system other vehicle and pumping systems are monitored, linked to its tracking ability modifications to the vehicles system can be made via the internet, reducing the time vehicles are off the run due to software problems. Ladder gantries are fitted to carry an assortment of ladders, 13.5 metre, 9 metre and roof ladders. The vehicle comes with local scene lights plus the ability to provide whole area lighting solutions via an extendable 360 light mast. The body work is of co-Polymer construction, better able to cope with small vehicle accidents, i.e. easier to repair in our in house workshop.

Crown Commercial Service (CCS)

Supply and Fit of Tyres Contract ID: RM955 Start Date: 10/08/2012 End Date: 09/08/2016

Description, This framework agreement has been extended by 2 months to provide continuity of service during the development of a new agreement - the new expiry date is 9 October 2016.

The framework agreement is for the supply and fit of a range of tyres and associated services to UK public sector bodies including central government departments and their arm's length bodies, non departmental public bodies, NHS bodies and local authorities. A choice of lots is available:

Lot 1: Supply and fit of tyres for Police Forces in the UK (including cars, 4x4s, vans, trucks, heavy vehicles and motorcycles)

Lot 2: Supply and fit of tyres to the wider UK public sector (for cars, 4x4s and vans)

Lot 3: Supply and fit of tyres to the wider UK public sector (for trucks, heavy vehicles and buses including retreaded tyres)

Lot 4: Supply and fit of tyres to the wider UK public sector (for motorcycles)

Lot 5: Supply and fit of tyres to the wider UK public sector (for agrarian vehicles)

HWFRS also use when ATS are unable to supply or to deliver a service within our time constraints, other local suppliers to HWFRS, This tends to be on our smaller vehicles.
