FIRE AND RESCUE SERVICE

PREVENTION

Think Fire Risk: a professionals' briefing

As a professional, think concerns around **mobility, cognition, hearing and hoarding**

Think concerns around **smoking, overloaded sockets, cooking, heating and candles**

Are there **working smoke alarms?** Would they be **able to hear** them and take **appropriate action?**

Can they **contact the Fire Service** in an **emergency?** Would **Telecare smoke alarms** be more appropriate?

Fire Control can **log information against an address** so the fire service is **aware of the greater risk** to a person

Would the adult / family consent to a Home Fire Safety Visit:
hwfire.org.uk/hfsv

Visits can include the **fitting of alarms, fire safety advice**, and the fitting of other **equipment to reduce risks**
